## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A Request for Continued Examination under 37 CFR § 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR § 1.114, and the fee set forth in 37 CFR § 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR § 1.114. Applicant's submission filed on February 29, 2008, has been entered.

Claims 84, 85, 87-92 and 94-109, are pending in the instant application, and are the subject of the Office Action below.

### ***Claim Rejections - 35 USC § 112 - Withdrawn***

The rejection of the claimed invention for lacking adequate written description is withdrawn in view of Applicants' arguments.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting

ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 84, 85, 87-92 and 94-109, are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the pending claims of U.S. Patent Application No. 10/801,509. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limited genus of compounds of the instant application is generic to the more specific genus of compounds in the '509 application.

Claims 84, 85, 87-92 and 94-109, are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the pending claims of U.S. Patent Application No. 11/753,331. Although the conflicting claims are not identical, they are not patentably distinct from each other because the limited genus of compounds of the instant application is comparable in scope to the small genus of compounds in the '509 application.

### ***Conclusions***

No claim is allowable, however, should Applicants file a terminal disclaimer over the above-cited co-pending applications, or the copending applications go abandoned, the instant claims would be in condition for allowance.

If Applicants should amend the claims, a complete and responsive reply will clearly identify where support can be found in the disclosure for each amendment. Applicants should point to the page and line numbers of the application corresponding to each amendment, and provide any statements that might help to identify support for the claimed invention (*e.g.*, if the amendment is not supported *in ipsis verbis*, clarification on the record may be helpful). Should Applicants present new claims, Applicants should clearly identify where support can be found in the disclosure.
